

House Committee on the Judiciary  
Rep. Bob Goodlatte, Chairman  
United States House of Representatives  
Washington, DC 20510

July 30, 2014

*For Distribution to all members.*

Dear Congressmen/Congresswomen,

Please permit us to present a document sent to President Barack Obama which has national impact relating to the judiciary. The situation has evolved to where it defies any corrective action by the judiciary.

In August 2013, a Constitutional Challenge to Rule 1.6 was filed and served upon the Attorney General for every state, fifty six in all, to address a law enacted by the state supreme courts without benefit of the state legislature or the signature of any governor. The unconstitutional aspects were not taken into consideration during construction of the law.

Every state attorney general failed to respond to the summons and challenge by the deadline, yet the district court refused to accept or acknowledge their deliberate default action. The Challenge was concealed and then dismissed based on unsubstantiated doctrine and fictional misinformation. That decision only served to harm the integrity of the court. The very integrity which the Challenge had sought to restore while re-securing the constitutional rights of all Americans.

The national foreclosure crisis is an example of Rule 1.6 confidentiality undermining the judiciary and removing people from their homes based on fraudulent and robo-signed documentation. Pennsylvania's Kids for Cash scandal demonstrated Rule 1.6 even more cleanly.

The judiciary is mandated to follow the very law which is being challenged and to protect the integrity of the court by sacrificing the integrity of the court. A seriously flawed logic which prevents lawyers and law enforcement from addressing judicial corruption and injustice within the state and federal judicial system. The federal courts follow the local (state) Rules of Professional Conduct where Rule 1.6 Confidentiality of Information is an indirect law which undermines the government and trumps EVERY law including the US Constitution.

Addressing the injustice of Rule 1.6 is an inevitability. Facing it responsibly will affect the public reaction to this realization. We ask your involvement, or where your direct action is 'unlawful', whatever assistance of support and resources which will permit us to succeed for the betterment of the nation in the best interests of every American.

We would appreciate the opportunity to meet with you to discuss the issue in further detail.

Sincerely,
